

TAXATION

Kreston Dormers

Understanding Vision Delivery

For most people there are many more pleasant things to think about than tax.

For those of us in business, ignoring tax is a luxury we cannot afford. At Kreston Dormers we don't pretend we can make tax enjoyable, but for business taxpayers at least we can eliminate a lot of the aggravation associated with the subject.

PLANNING

We will encourage you to prepare interim financial accounts. It helps us give you more effective tax planning options.

TAX STRUCTURING

Successful tax planning depends a good deal on effectively structuring your business. For example, we can show you how to retain flexibility whilst managing the CGT implications of selling the business.

CAPTIAL GAINS TAX

CGT is a minefield. Many business owners and even some accountants get lost in it. Don't be one of them. We'll help you identify potential CGT exposures and recommend strategies for minimising them.

International taxation and trading arrangements
Offshore expansion can be an attractive business option. Of course, there are significant and potentially unwelcome tax implications. Through our domestic offices, or via Kreston International, we can advise on these complex matters.

INDIRECT TAXES

Businesses often mismanage their indirect tax exposures, particularly fringe benefits tax and payroll tax. It can result in higher than necessary liabilities. We can help you keep on top of indirect taxes.

COMPLIANCE COSTS

We seek to keep your tax compliance costs to a minimum through astute planning and management. In fact, we prefer to invest our resources in adding value to your business. And who needs a tax planning bill that's larger than the amount of tax actually saved?

"In this world nothing can be said to be certain, except death and taxes."

Benjamin Franklin
